

Nehemiah Yusuf

FULL-STACK WEB & MOBILE SOFTWARE DEVELOPER

+234 814 077 9474 | nehechiwar@gmail.com | <https://linkedin.com/in/nehemiah-yusuf> |

<https://nehemiahyusuf.vercel.app/> | Jos, Nigeria

PROFILE

- Full-stack software developer with extensive experience building multi-platform mobile and web applications using modern frameworks including React Native, Flutter, Next.js, Django, and FastAPI.
- Proven track record of architecting scalable solutions from the ground up, including multi-tenant financial applications (MicroLoan NG, IWC Exchange) and custom AI/computer vision integrations (YOLOv8).
- Highly adaptable problem-solver, eager to collaborate with experienced teams and contribute to building high-performance mobile applications

AREAS OF EXPERTISE

Core Competencies: Full-Stack Web & Mobile Development, RESTful API Design, Relational Database Architecture (PostgreSQL/MySQL), Custom Object Detection & AI Fine-Tuning, Embedded Systems (Raspberry Pi 4).

Platforms & Frameworks: React Native, React, Next.js, Flutter, Django, FastAPI, Laravel, Express.

Technical Awareness: TypeScript, Tailwind CSS, Python, Cybersecurity & Penetration Testing.

Languages: English (fluent).

PROFESSIONAL EXPERIENCE

Mobile & Full Stack Developer | IWC Exchange

- Architected and developed a comprehensive cryptocurrency exchange platform featuring functionalities similar to Binance, OPay, and TrustWallet.
- Built the mobile application frontend using **Flutter and Dart**, implementing **Provider** for efficient state management.
- Managed the entire **Android app lifecycle** from initial development through to final implementation.
- Developed a robust backend using **FastAPI** and **PostgreSQL**, creating secure **REST APIs** for seamless mobile-to-backend integration.
- Designed the complete UI/UX and coded the web application frontend utilizing React and Tailwind CSS.

Mobile Application Developer | Proptibaank

- Developed key features for the Proptibaank real estate and transport investment mobile platform.
- Implemented secure user profile editing and bank verification flows to ensure financial compliance and user data protection.
- Designed and deployed partner dashboard features, improving system usability for platform stakeholders.

IT Instructor | NAFOWA Vocational Center, Kaduna

- Delivering comprehensive instruction in programming and software development to vocational students.
- Designing practical curriculum bridging theoretical concepts with hands-on multi-platform web and mobile frontend development.
- Guiding students through modern development workflows and best practices for building scalable applications.

Software Engineer (Research & Special Projects) | Independent / Hackathons

- Built an end-to-end encrypted chat application prototype with metadata protection, running Python scikit-learn simulations to evaluate defense against machine learning adversary models.
- Designed a smart course registration and timetable conflict detection system utilizing Django, React JS, and Welsh-Powell graph coloring algorithms.
- Developed "OfflineTutor", an offline AI coding tutor application with interactive lesson generators and FastAPI integrations for the Google AI Workshop Hackathon.

Full Stack Web Developer | Freelance

- **Thawigs Multiconcepts:** Designed and developed a complete loan website from scratch using PHP and Laravel, handling all UI design and full-stack implementation.
- **Princess Diana Madaki Foundation:** Built the official NGO website using React to drive online engagement and visibility.

Full Stack Developer (Freelance) | Association of Dental Technologists in Nigeria (ADTN)

- Designed and developed the official association website using React, HTML, CSS, and JavaScript.
- Integrated the frontend with a Django backend for secure authentication and content management.
- Managed the full deployment cycle using Git, deployed via Render

Frontend Developer Intern | Afriment (Remote)

- Collaborated on the Setlinn project, a web platform for Nigerian students relocating to Germany.
- Built responsive frontends using React, TypeScript, HTML, CSS, and JavaScript, ensuring mobile-first, cross-browser compatibility.
- Collaborated via Git for version control and deployed updates using CI/CD workflows

Mobile Developer Intern | NASCO Groups, Jos

- Built and tested cross-platform mobile apps using **Flutter** and React Native.
- Optimized UI responsiveness and reduced render latency by 30% through efficient state management and code splitting.

UI/UX Intern | Stardelite (Remote)

- Designed and prototyped responsive interfaces for web and mobile using Figma.

UI/UX Intern | Bluehouse Technologies, Jos

- Created interactive prototypes and design systems aligned with frontend implementation needs.

QUALIFICATIONS

- B.Sc. Computer Science - Air Force Institute of Technology, Kaduna
- National Diploma in Computer Science - Federal Polytechnic, Mubi
- Specialised in software development, computer vision, and multi-platform integrations.
